PART H. Hydrographic Survey Sheet Maps (6).....H-1

## **Explanatory Notes and Glossary of Terms.**

This Addendum summarizes the elements of all rights for surface water irrigation in the Rito de Tierra Amarilla Subsection of Section 7 of the Rio Chama Stream System (“Tierra Amarilla Subsection”) as those rights are set forth in individual subfile orders and applicable general orders entered by the Court in the Rio Chama adjudication proceedings. The substantive element of these water rights are those described and adjudicated by individual subfile orders and applicable general orders, unless clearly stated otherwise in the Addendum.

The Addendum is divided into two Books. Book 1 contains a summary of all surface water irrigation rights in the Tierra Amarilla Subsection and individual maps showing the location of each irrigated tract. Book 2 contains indexes of the description of the water rights, a summary of information for ditches, and orders entered by the Court that pertain generally to all subfiles for surface water irrigation rights. Book 2 also contains large format sheet maps showing the location of all tracts in the Tierra Amarilla Subsection described in the Addendum.

All claims to the diversion and use of public surface water in the Tierra Amarilla Subsection for irrigation purposes have been determined and adjudicated by the Court, and the individual subfile orders concerning those rights have been expressly approved and confirmed as valid as of the date of the entry of the individual subfile order. Changes in ownership of land or water rights, or the subdivision of land, or the transfers of any water rights that occur after the date of the entry of individual subfile orders are not included in this summary. Information on transfers or changes in ownership of water rights that occur after the date of the entry of individual subfile orders is available from the Water Rights Division of the Office of the State Engineer and the W.A.T.E.R.S database.

Individual subfile orders entered by the Court are binding upon named defendants and their successors, representatives, heirs, and assigns. Individual subfile orders do not represent an adjudication or determination of title or ownership of land. The term “defendant” refers to the party in the adjudication proceedings who is named in an individual subfile order entered by the Court. This person or entity may or may not be the current owner of the land in question. Successors in interest to the original party/defendant named in individual subfile orders who have requested a substitution of parties under Fed. R. Civ. P. 25 are listed in Part III of the Addendum following the Defendant Index.

Defendant: Person or entity joined as a party to the Rio Chama adjudication proceedings and named in individual subfile orders.

No Right: Tract of land determined to be without surface water irrigation rights.

CIR: “Consumptive Irrigation Requirement” or the quantity of water, expressed in acre-feet per acre per year, exclusive of effective precipitation, that is consumptively used by plants or evaporated by the soil surface during one calendar year.

FDR: “Farm Delivery Requirement” or the quantity of water expressed in acre-feet per acre per year, exclusive of effective precipitation, delivered to the farm headgate or which is diverted from a source of water which originates on the farm itself, such as a well or spring, necessary to satisfy the consumptive irrigation requirements of crops grown on a farm in one calendar year.

PDR: “Project Diversion Requirement” or the quantity of water exclusive of effective precipitation, which is diverted from the stream or an off-farm source to satisfy the farm delivery requirement for one calendar year.

CIR, FDR, and PDR are defined in the *Order Making Final Determination of Irrigation Water Requirements in the Rito de Tierra Amarilla Subsection of Section 7 of the Rio Chama Stream System*, filed January 18, 2018 (Docket No. 11316). The irrigation water requirements in that order do not include diversion requirements associated with stockwatering, stockponds, or other impoundments determined to have valid water rights in these proceedings.

The administrative file numbers assigned to water rights described in the Addendum by the Office of the State Engineer (“OSE File No.”) are not listed in the summary of water rights in Part 2.

All claims to the diversion and use of public surface water in the Tierra Amarilla Subsection for irrigation purposes have been determined and adjudicated by the Court. The default judgment against unknown claimants of interest to surface water in the Tierra Amarilla Subsection filed January 18, 2018 acts as a bar to further claims for surface water irrigation rights in the Tierra Amarilla Subsection. *See Order granting State’s Motion for Default Judgment Against Unknown Claimants of Interest in the Rito de Tierra Amarilla Subsection of Section 7 of the Rio Chama Stream System*, filed January 18, 2018 (Doc. 11316).

Please note: where non-substantive typos or “scrivener’s errors” were found in the Addendum to the Proposed Partial Final Judgment and Decree, those typos have been corrected for this Addendum. The corrections made in no way affect the water rights described in the Addenda.

# **PART A.**

## **Summary of Surface Water Irrigation Rights in the Tierra Amarilla Subsection**

**PART A. Summary of Surface Water Irrigation Rights in the Rito de Tierra Amarilla Subsection of Section 7 of the Rio Chama Stream System**

The following summary includes a subfile-by-subfile description of surface irrigation water rights in the Tierra Amarilla Subsection beginning with Subfile No. CHTA-001-0001. The summary for each right includes the defendant's name and a reference to the subfile order filed with the Court in connection with that defendant, the priority, source of water, purpose of use, point of diversion, location and amount of irrigated acreage, and amount of water of the rights described. In cases where a new party/defendant has formally been substituted under Fed. R. Civ. P. 25 for the person or entity named on a subfile order, this information is also provided. A subfile map showing the location of each individual irrigated tract follows the description of the water right. Tracts of land determined to be without surface water irrigation rights ("No Right") are also included in this summary.

Large format sheet maps showing the location of all tracts described are included in a folder in Book 2.
